

Mutual Success Partners

Website Redesign Specification

Version 2.0

Project Vision

Our goal is to redesign the Mutual Success Partners website to feel less like a traditional marketing agency and more like a premium consulting firm.

The website should create curiosity, educate visitors about revenue leaks, and guide them through an interactive experience that naturally leads them to complete our Revenue Opportunity Calculator™ and Revenue Recovery Assessment™.

The attached mockup should serve as the visual direction. The layout, spacing, typography, colors, and overall experience should closely resemble the mockup while remaining fully responsive for desktop, tablet, and mobile.

Overall Design Direction

The website should feel:

- Premium
- Modern
- Minimal
- High-end
- Professional
- Interactive
- Easy to follow

Visitors should feel like they are interacting with a business assessment—not simply reading another company website.

Design language:

- Matte black / charcoal background
- White typography
- Blue accent color matching our logo
- Large typography
- Plenty of whitespace
- Rounded cards
- Subtle animations
- Clean transitions

Avoid:

- Clutter
- Long paragraphs
- Too many colors
- Generic marketing agency design
- Multiple competing CTAs

Section 1 – Hero

Purpose: Immediately communicate that we help businesses recover revenue they are already losing.

Left: Large headline, supporting copy, primary CTA.

Right: Interactive Revenue Opportunity Calculator™.

Navigation: How It Works | Assessment | About | Contact

Top-right CTA: Get My Revenue Score

Section 2 – Revenue Opportunity Calculator™

This is the most important feature on the website.

The calculator must be fully interactive (not static).

Inputs:

- Monthly Opportunities (slider)
- Average Job Value (slider)
- Average Response Time (slider)

As users move the sliders, the following should update automatically in real time:

- Estimated Annual Opportunity
- Revenue Growth Score
- Potential Additional Monthly Revenue
- Estimated Additional Jobs
- Potential ROI

CTA: Get My Full Revenue Report

The exact calculation formula can be finalized later, but the experience should feel instantaneous and premium.

Section 3 – Revenue Leak Journey

Interactive visual showing:

Lead → Call → Appointment → Follow-up → Customer

Use subtle red indicators to highlight where revenue commonly leaks. Minimal animation preferred.

Section 4 – Common Revenue Leaks

Display as a clean icon grid:

- Missed Calls
- Slow Response Times
- Leads That Never Get a Follow-Up
- Estimates That Go Cold
- No-Shows & Cancellations
- Manual Administrative Work

Use subtle hover animations.

Section 5 – Small Leaks. Big Impact.

Do not use unsupported statistics.

Instead use qualitative impact cards:

- Profit Left on the Table
- Time Lost to Manual Work
- Missed Opportunities
- Untapped Revenue Potential

Section 6 – How We Help

Simple three-step process:

Identify → Implement → Grow

Avoid listing software. Focus on solving business problems.

Section 7 – Final CTA

Large headline with one clear button:

Get My Free Revenue Score

Footer

Logo only (no text underneath).

Animation & Mobile

Animations should be subtle (fade-ins, hover states, count-up numbers, smooth transitions).

Ensure an excellent mobile experience with responsive layouts, touch-friendly sliders and buttons, and clean stacking.

Final Notes

The attached mockup is the primary visual reference I'd like to duplicate.

The goal is not to recreate a typical business website. It is to create an interactive experience that makes visitors ask:

“How much revenue is my business leaving on the table?”

Every design decision should support that objective.

Designers are encouraged to improve spacing, interactions, and UX while preserving the overall vision.
